To begin our Space exploration, grades 5/6 had the task of creating interesting and informative posters about a planet of their choosing.

There were some juicy Jupiter facts, some very vibrant Venus posters and many marvellous Mercury posters! Students also completed a detailed activity where they arranged the planets in correct order from the Sun.

**The finished products were out of this world!**
As part of our Well-being Program, the grade 5/6 area have put an amazing effort into making sure our classroom doors reflect the fantastic team of individuals who dwell beyond the doors!

5/6DA have chosen a Super Mario theme while 5/6JT are going strong with Pokemon! Well done to all our Superheroes and Terrific Trainers!
